BITBONUS

DESCENTRALIZED

TOKEN

WHITEPAPER

SUMMARY

BITBONUS

1 - INTRODUCTION

BitBonus was developed with the objective of meeting the needs of people in a delicate moment in the global economy.

Thinking about all the financial problems of the world population due to the crisis caused by the pandemic of the COVID-19 virus and the search for a source of digital income, we created a token that will be used for payments for digital services such as marketing, among others!

2 - THE INITIAL IDEA

Working with targeted marketing groups in the mid-2019, the BitBonus team saw the growth of a new type of market in the digital world.

Used mainly by people who would like to have a second source of income, this idea was consolidated and expanded in a scenario that would have no return.

3 - THE PROBLEM

At the end of 2019 and beginning of 2020 we had a boom in the world where a virus changed the routine of the world population without the right to return.

Then there was an economic and financial crisis with many unemployment and destruction of professional careers.

Several people lost their jobs and in some countries the prices of products, until then simple, started to be scarce and inaccessible for the majority of the population. Those who have not lost their jobs have started working from home, where the Home Office system has become very common and sorely needed.

The digital market, until then secondary, would now become the main source of income for a large part of the population, causing companies to seek marketing solutions to attract new and old customers.
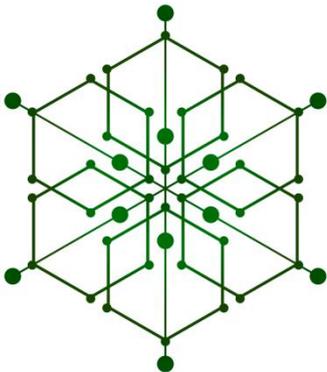

4 - THE SOLUTION

Aiming at this growth, the BitBonus team began to put into practice the idea of bringing a digital payment method for these services to this market, being accessible to everyone, offering fast, secure and practical payments.

We present to the community a TOKEN created in BLOCKCHAIN TRON (TRX), which has several tools already developed and ready for use, such as portfolios, trading platforms and other services.

In this way a quick and practical payment method will start to be used, ensuring that the service provider receives your payments practically in real time, as soon as your task is executed and you can have total autonomy to manage your earnings, being able to keep them saved in a portfolio or can be converted into a decentralized exchange bureau for any other asset.

5 - TECHNICAL INFORMATION

BITBONUS is a decentralized TOKEN TRC20 created through an intelligent contract on the TRON cryptocurrency network (TRX).

TRC-20 is a technical standard used for smart contracts at BLOCKCHAIN TRON (TRX) to implement TOKEN with the TRON (TVM) virtual machine. It is fully compatible with ERC20.

6 - TECHNICAL SPECIFICATIONS OF TOKEN

Base Currency: TRON (TRX)
Contract Address: TVNEBWU8EdLJ582VB86FPZyWwpCNJCpjfN
Base Address: TWysT7azkQDfvhgmVgn6aHnwsHGZTTV1fM
Maximum Supply: 50,000,000,000

7 - ABOUT DISTRIBUTION

Of the 50 billion TOKENS created, the launches are divided into the areas below with the following distribution plans:

DISTRIBUITION AREA	AMOUNT	PERCENTAGE
AIRDROP	4,000,000	0.01%
APPLICATIONS	5,000,000	0.01%
TASKS	5,000,000	0.01%
TEAM	6,000,000	0.01%
FAUCET	10,000,000	0.02%
INSTITUITIONS	10,000,000	0.02%
PARTNERS	10,000,000	0.02%
MARKET	860,000,000	1.72%
ICO	1,000,000,000	2.00%
PROJECT RESERVATION	48,090,000,000	96.17%
DISTRIBUTION TOTAL	50,000,000,000	100.00%

7.1 - ICO

The initial money offering process is carried out in phases, as follows

- **PHASE 01**
  - ❖ Start: 2021/04/15
  - ❖ End: 2021/07/20
  - ❖ Number of coins: 500,000,000

- **PHASE 02**
  - ❖ Start: 2021/07/30
  - ❖ End: 2021/11/20
  - ❖ Number of coins: 500,000,000

7.2 - TEAM

This distribution portion serves as financial support for team members who are working to develop and maintain the entire BBNS structure.

7.3 - MARKET

The balance made available to markets is used for injection into liquidity pools within the decentralized platforms of which we are a part, with 35,833,333 BBNS and 417 TRX injected within a maximum period of 24 months.

NOTE: In decentralized platforms, the injection of coins into liquidity pools must be carried out in the 2 currencies that are market participants, that is, when injecting BBNS, we are also obliged to inject the opposite currency in the trading pair.

7.4 - AIRDROPS

Airdrop is defined as the process by which we on the BBNS team distribute tokens to some users' wallets for free.

Usually these payments occur to users who perform small actions performed by the team, and are promptly rewarded.

The payment of Airdrops is made during the project, without defined dates, but always previously notified on all social networks.

In addition, companies that are already in the cryptocurrency market, such as cryptocurrency buying / selling platforms and wallet services, can also perform airdrops for their users.

7.5 - TASKS

We have separated some of the best options for motivating our users through challenges over time.

These challenges are a method we have found to reward our users.

Task campaigns are launched, through disclosures through partners. So the public can participate freely at any time and place.

At first, it is necessary for those interested to perform some tasks that will be required, such as: following social networks, inviting friends, among other things. Then you need to perform basic data, such as your username, receipt address and / or accounts on social networks for confirmations.

Rewards are paid instantly via robots and / or deposits into participating platform portfolios.

7.6 - APPLICATIONS

Balance directed to payments for BBNS implementations in third-party applications, as well as the balance can also be used to pay for development of native BBNS applications.

7.7 - FAUCET

The resources aimed at this area are intended for platforms that work with coin distribution systems for free, as a way for the user to get some coins without having to perform any task.

7.8 - INSTITUTIONS

Distribution applied to help entities that do not receive government aid. The distribution carried out here occurs after analysis of basic criteria, such as reliability of the site, time of structuring the environment, involved in the management and maintenance of these entities, etc. Supporting documentation can be requested during the entity's registration process.

All entities that will receive our help will be listed on the website: https://bit-bonus.com.

7.9 - PARTNERS

Amounts were reserved for partnerships with YouTuber's, active users on Instagram and / or several companies in the most varied segments.

All values are agreed directly with the partners, and may vary according to the scope and magnitude of the partner in question.

7.10 - PROJECT RESERVATION

The BBNS reserve fund is the security of the accounting project. This fund protects investors from market manipulation or fraud around spam users. The creation of the investment reserve has the objective not only of protecting the patrimony economically, but also to guarantee the financial reserve of the project, making a financial investment in a better scenario for investors.

The reserve fund is also used to correct possible shortages of funds in some of the areas, always maintaining the vision of protecting the investor.

8 - PROJECT DEVELOPMENT

Based on the idea of creating a payment system for people who perform tasks, BBNS provides a distribution system that works initially with a group in the Telegram instant messaging application, where the user has a list with a list of all tasks to be performed.

The tasks are of different modalities, such as, for example, liking or sharing a certain text or message on any of the available social networks or direct invitations to participate in the BBNS project.

Payments are made directly to the user ID or directly to a registered / requested BBNS address. Task deadlines are determined by advertisers. BBNS has projects stipulated in the roadmap that will make official and proprietary platforms provide better access and performance for users in performing designated tasks.

9 - CONCLUSION

In the articles mentioned above there are several advantages in a document created and planned by the BBNS team for our community.

The content of this document is rich with all the information necessary to capture the points of execution and planning of the entire project.

We would therefore like that with the presentation of this, all doubts are resolved and that the community can better execute all the proposals described here.

Believing in the well-being of all and in a future of prosperity, we thank you for reading so far as well as your participation in the growth of this project.
